OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 312/26

Bangalore 7th July 1913

From M Shama Rao Esq L A
Inspector General of Education in Mysore

To C S Balasubramaniam Iyer Esq B A
Secretary to the Government of His Highness the
Maharaja of Mysore Departments of Education &c

Sir

I have the honour to inform you that the period of two years for which the scheme for working the Pottery Section of the Mysore Industrial School as a separate Department was sanctioned in Government Order No 9970-1/Edn 330-10-2 dated 1st June 1911 expired on the 30th June 1913 The Superintendent of the Industrial School Mysore having sought for instructions in regard to the expenditure to be incurred for working the Pottery Section after 1st July 1913 I have in anticipation of sanction allowed him to continue the transactions as usual ultil further orders

In the circumstances I request that Government may be pleased to sanction the continuance of the scheme sanctioned in Government Order cited above until the question of transferring the Pottery Section to a private agency which is pending before Government is settled I request that you will be so good as to treat this as urgent and obtain early orders of Government

I have the honour to be
Sir

Letter No 149 dated 9/12th August 1913 from the Superintendent Govt Industrial School Mysore to the Inspector General of Education in Mysore

---

I have the honour to submit my report on the working of the Pottery Section with 3 statements of receipts and expenditure for the year 1912-13

2 There were 82 coolies (men and boys together) on the last working day of the year as against 77 on the corresponding day of 1911-12 All the boys being taken under coolies the stipendiary system was entirely stopped from 1st July 1912

3 The work of the motor shed was completed the new crushing mill was fitted up and the tile presses and pug mill were removed and refitted in the new shed by the 16th September 1912, when electric current was turned and the pug-mill began to be worked with power

4 The work till then was being conducted as usual with increased difficulties of the old engine There was practically very little work during the first quarter of the year under report The 15 horse power motor now fitted up in the school was unable to drive both the crushing mill and pug mill together and consequently the crushing mill is left unused and the work is carried on with the pug-mill alone As the crushing mill is not in use the clay had to be ground twice in the pug-mill before tiles are made The racks and planks ordered to be prepared in the school were all finished and supplied late in the year Nothing was done to improve the burning accommodations and the tiles had to be burnt twice on many occasions which greatly incurred the consumption of fuel The initial cost (viz the building of the motor shed the purchase and fitting up of the machinery) took away the greater part of the

amount

amount sanctioned for the working expenses as submitted in this office Nos 961/22-6-12 and 192/17-2-12 and the special allotment of Rs 5000/- set apart for the initial expenditure was kept in the latter part of January 1913 at the disposal of the Committee only after several representations The work had therefore to be carried on under great disadvantages Arrangements for storing clay and fuel could not conveniently be made in time All these circumstances therefore made it impossible to give effect to the proposal of working the Section on contract as per G O No 9970-1/Edn 330-10-12 dated 1st June 1911 and better results could not be arrived at

5 It will be seen from statement A that the total expenditure of the Section was Rs 13430/- with a receipt of Rs 6881/- There was on the last working day of the year an excess of stock etc of Rs 529/- The net cost was thus Rs 6220/- which included an initial cost of Rs 4065/- on account of motor shed fitting up of machinery etc Thus the actual net cost was Rs 2155/- The value of manufactures for the year 1912-13 is as shewn by statement C Rs 8374/- as against Rs 6230/- in 1911-12 The loss was only Rs 967/- as against Rs 1459/- in 1911-12 The fact that there was a decrease in loss and an increase of about 33⅓ in the value of manufactures in spite of so many disadvantages the section had to labour under as detailed in para 4 supra and the stoppage of work for about a month on account of refitting of the machinery in the newly constructed shed and the time taken in testing the motor by the Electric Department shows that the branch will be commercially successful if all the necessary conveniences are given

6 The present Laistry has lost all hopes of giving the section to him on contract system as proposed on previous occasions and the work he turns out at present is far from satisfactory I respectfully submit therefore that early arrangements may kindly be made to work the section on commercial lines so as to achieve better success in this important industry
